

DEPARTMENT OF RADIOLOGY & IMAGING

PATIENT'S NAME : MRS. KALPANA PORWAL
REG. NO. : OPD
CONSULTANT : Dr. SEEMA VIJAYWARGIYA

Report No. 2,877

30/05/2014

WHOLE ABDOMEN SONOGRAPHY

Liver is of normal size, shape, has smooth margins & regular contours & the parenchyma is normal in echostructure. No focal lesion.

Gall bladder is of normal size, shape, has thin walls & the contents are clear fluid. No evidence of any calculus. Biliary tree is undilated.

Pancreas is normal, no focal / diffuse pathology. Spleen is normal.

Both kidneys are normal in size (Right 10, Left 10cms. in length) and shape. The renal outlines are smooth & regular, the cortical thickness is adequate and the parenchyma is normal in echostructure. There is a small calculus seen in both kidneys 5mm in right upper & 4mm in left lower calyceal region. Minimal fullness of right pelvicalyceal system & upper ureter. The mid & distal ureter appears undilated? Small mid ureteric calculus? non specific (Post operative). The collecting system and ureter on left side is undilated. No ureteric calculus on left side.

Urinary bladder is normal in size, shape & has thin walls. ✓
PVR is negligible.

Uterus is of normal size (measures about 6.3 x 4.6 x 3.4cms in dimension) and retroverted in shape. The uterine outline are smooth & regular and the myometrial echopattern is normal. Endometrial echoes are central & thin. ✓

Both ovaries are normal in size, shape and echostructure. ✓

No adnexal / pelvis mass of cyst or collection.

There is no ascitis. No obvious abdominal lymphadenopathy. No sub/ supra diaphragmatic pathology on either side. ✓

Dr. Sunita Sullere, DMRD
(Consultant-Radiologist)
